HILKIA LOURDES G

MERN Stack Developer

+91 8946050196 ghilkialourdes@gmail.com Madurai, Tamil Nadu, India - 625019 g-hilkia-lourdes

PROFILE SUMMARY

Full Stack Developer with hands-on experience building and maintaining scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Experienced in developing 10+ real-world projects across HRMS, FinTech, cryptocurrency trading, ride-booking, and blockchain/token launchpad domains. Skilled in RESTful APIs, authentication, database design, Redux, Web3 integrations, Socket.IO, and third-party APIs. Strong problem-solving and debugging skills with experience delivering maintainable, production-ready applications.

EDUCATION

Bachelor of Engineering - Computer Science and Engineering *2019 - 2023*
Sethu Institute of Technology, Virudhunagar, Tamil Nadu, India - 626115 *CPGA 9.11 / 10*

Higher Secondary School - Grade 12 *2018 - 2019*
St. Joseph's Matriculation Higher Secondary School, Madurai, Tamil Nadu, India - 625009 *71.17%*

Secondary School - Grade 10 *2016 - 2017*
St. Joseph's Matriculation Higher Secondary School, Madurai, Tamil Nadu, India - 625009 *91.2%*

EXPERIENCE

Maticz Technologies Private Limited - MERN Stack Developer *May 2025 - September 2026*

- Developed scalable applications using MongoDB, Express.js, React.js, and Node.js across HRMS, FinTech, and blockchain.
- Developed RESTful APIs, business logic, authentication, authorization, validation, and database workflows.
- Built reusable React.js components and managed application state using Redux.
- Designed and optimized MongoDB/Mongoose schemas, queries, aggregations, pagination, filtering, and data population.
- Troubleshot and resolved frontend, backend, database, API, and deployment issues using Git, Postman, Redis and RabbitMQ

Great Innovus Solution Inc. - Trainee *February 2023 - March 2023*

- Gained hands-on experience with business process automation using Microsoft Dynamics 365 Business Central.
- Assisted in configuring modules related to finance, inventory, and business workflows.
- Supported system testing and documentation for ERP implementation.

ZOHO Corporation Private Limited - Project Trainee *September 2022 - November 2022*

- Developed responsive UI components using HTML, CSS, and JavaScript for internal web applications.
- Assisted in implementing Zoho Books API integration for inventory management features.

PROJECT

H'MDAL *HRMS & Employee Management System*

Technologies : React.js, Node.js, Express.js, MongoDB, Redux, JWT, Socket.IO, Electron.js

- Developed HRMS modules for employee attendance, leave, permissions, and activity tracking.
- Built RESTful APIs, JWT authentication, role-based authorization, and device validation.
- Implemented real-time updates, CSV attendance reports, pagination, filtering, and MongoDB/Mongoose operations.
- Developed an Electron.js desktop application and resolved frontend, backend, and database issues.

K-Ride *Ride Booking Platform*

Technologies : React.js, Node.js, Express.js, MongoDB, Redux, Docker

- Developed ride-booking and user management modules using React.js, Node.js, Express.js, and MongoDB.
- Built REST APIs with authentication, authorization, validation, and ride-related business logic.
- Implemented reusable React components and Redux-based state management for application workflows.
- Used Docker for containerization and supported application debugging and deployment.

Galfi *Token Presale & Launchpad*

Technologies : React.js, Node.js, Express.js, MongoDB, Web3, JWT

- Developed token presale and launchpad modules covering presale creation, participation, and management.
- Implemented presale validation, allocation limits, payment workflows, and overlapping-sale prevention.
- Developed token vesting functionality with cliff periods, duration, and configurable vesting intervals.
- Built REST APIs and MongoDB workflows for users, investors, presales, transactions, and vesting data.

SKILLS

Programming Languages: *C, C++, Python, JavaScript*

Frameworks: *Node.js, Express.js, React.js (User Interaction), Electron JS*

Database: *Mongo DB, Oracle SQL, MySQL*

Tools: *GIT, Postman, ChatGPT, Claude, Codex, Co-pilot*

Technologies: *Redux, Authoriztion, Authentication, REST API, API Integration, Docker*
